## PROFESSIONAL SUMMARY

Full Stack Engineer experienced in building AI-powered platforms, security automation solutions, and cloud-native applications. Skilled in FastAPI, React, Kubernetes, Azure, AI agents, and distributed systems, with experience developing compliance intelligence, phishing analytics, and enterprise cloud platforms.

## EXPERIENCE

- Eli Lilly and Company** Jan 2026 – Present  
*Cyber Security Intern - Threat Mitigation* Bangalore, India
  - Built AI-powered compliance and security analytics platforms using Claude agents, FastAPI, Kubernetes, Azure services, and cloud-native architectures.
  - Developed a compliance intelligence assistant enabling auditors to query enterprise evidence and map findings across ISO 27001, NIST, and HIPAA frameworks while enforcing Azure AD group-based RBAC.
  - Automated deployments using GitHub Actions, Docker, Kubernetes, Argo CD, Azure services, and subscription-level cloud resources.
- BroadBITS - Computer and Network Security**  May 2024 – June 2025  
*Backend Intern → Full Stack Developer* Remote, Kuwait
  - Built secure GraphQL APIs and scalable backend services supporting business automation.
  - Developed React-based interfaces and optimized platform performance and reliability.

## EDUCATION

- Manipal Institute of Technology** Expected May 2026  
B.Tech Computer Science Engineering (Artificial Intelligence) Bengaluru, India

## ENTERPRISE AI & SECURITY PLATFORMS

- AI Compliance Assistant**  
*Claude Agents, FastAPI, gRPC, Azure AD, RBAC*
  - Built an AI-powered compliance assistant adopted by the Threat Mitigation team, enabling auditors to query enterprise security evidence and map findings across ISO 27001, NIST, and HIPAA frameworks.
  - Developed a Claude-agent workflow retrieving permission-scoped evidence from policies, logs, and system records with source-linked responses.
  - Architected a FastAPI and gRPC platform with Azure AD group-based authorization, RBAC, SSE streaming, gap detection, and human-review controls.
- Enterprise Phishing Reporting Platform**  
*Python, GitHub Actions, Azure Functions, Splunk*
  - Built an automated phishing simulation reporting platform supporting security awareness operations for 80,000+ employees, eliminating manual effort and reducing costs.
  - Designed Azure Function proxies and asynchronous workflows to overcome Splunk Cloud networking restrictions and long-running query constraints.
  - Implemented automated false-positive detection and Power Automate reporting workflows improving campaign targeting accuracy.
- AI-Powered Phishing Analytics Platform**  
*FastAPI, React, Kubernetes, Argo CD*
  - Built an AI-powered phishing analytics platform used by senior leadership and security stakeholders for natural-language exploration of campaign performance.
  - Developed FastAPI and React services supporting SSE streaming, session management, rate limiting, and campaign visualizations.
  - Deployed workloads on Kubernetes using Docker, GitHub Actions, and Argo CD.

## SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL
- Frontend:** React, TypeScript, Zustand, Material UI
- Backend:** FastAPI, Django, REST APIs, GraphQL, gRPC
- AI Systems:** Claude Agents, LangChain, RAG, Prompt Engineering
- Cloud Platforms:** Azure, Azure Functions, Azure AD (Entra ID), Azure Subscriptions, AWS S3
- DevOps & Infrastructure:** Docker, Kubernetes, Argo CD, GitHub Actions
- Security & Analytics:** ISO 27001, NIST, HIPAA, Splunk, Pandas, Power BI
